

"Landscape Drawing" Grading Rubric

	Point Rating	Aerial Perspective	Landscape Grounds	Linear Perspective
Student shows strong understanding and exhibits it with exceptional creativity	5	Drawing successfully recedes into deep space using Value, Form, and Texture on an original landscape	The three basic grounds are clear and attention is purposefully drawn to one particular ground on an original landscape	Linear perspective is accurately used to place multiple buildings believably on an original landscape
Student shows strong understanding and completes objective with outstanding success	4	Value, Form, and Texture change according to distance on an original landscape	Foreground, middle ground, and background are clear in an original landscape	Linear perspective is used to place an object believably in an original landscape
Student successfully demonstrates an understanding of the objective	3	Some atmospheric changes are accurately used between grounds.	The landscape drawing contains a foreground, middle ground, and background	Linear perspective is used correctly
Student attempts but fails to exhibit an understanding of a given objective	2	Atmospheric qualities exist but lack correct use.	Less than three grounds are apparent	Linear perspective is attempted but is incorrect
Student completes assignment but exhibits poor understanding and effort	1	Clear conscious use of atmospheric perspective is absent.	Grounds are not distinguished	Linear perspective does not exist
