

Local V.

To find the Local Value of an item or clothing, you need your Value Scale. The item your finding the value for must not stand out.

∞ Variations

Variations

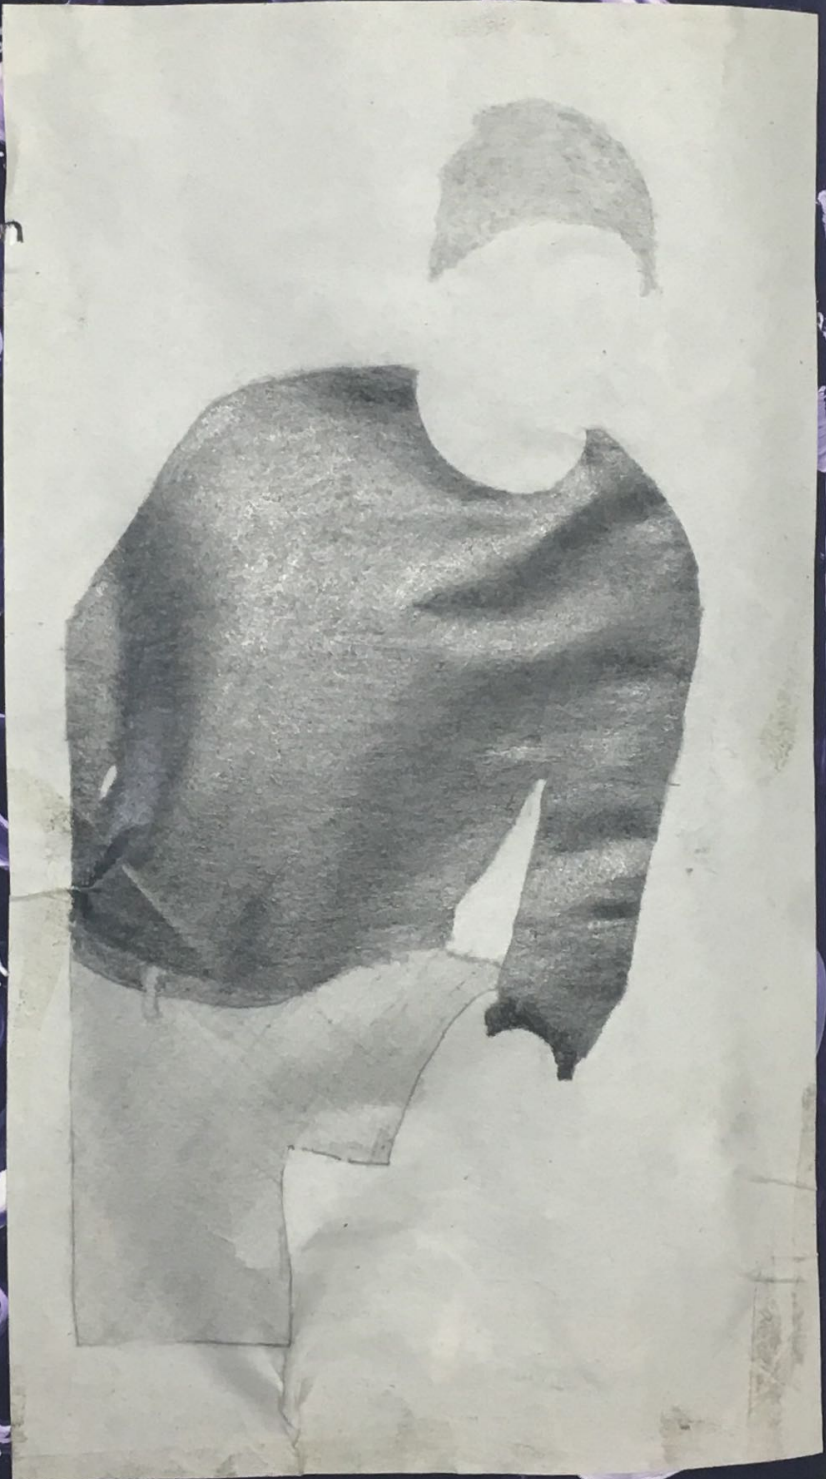

our Local Value drawing must not have
out lines. And then you color in your drawing.

Local Value: refers to the essential value of
an objects figures

Surface
without
the inclusion
of any
texture or
lighting.

Value of
an object
or figure
without
any shadow
pattern.

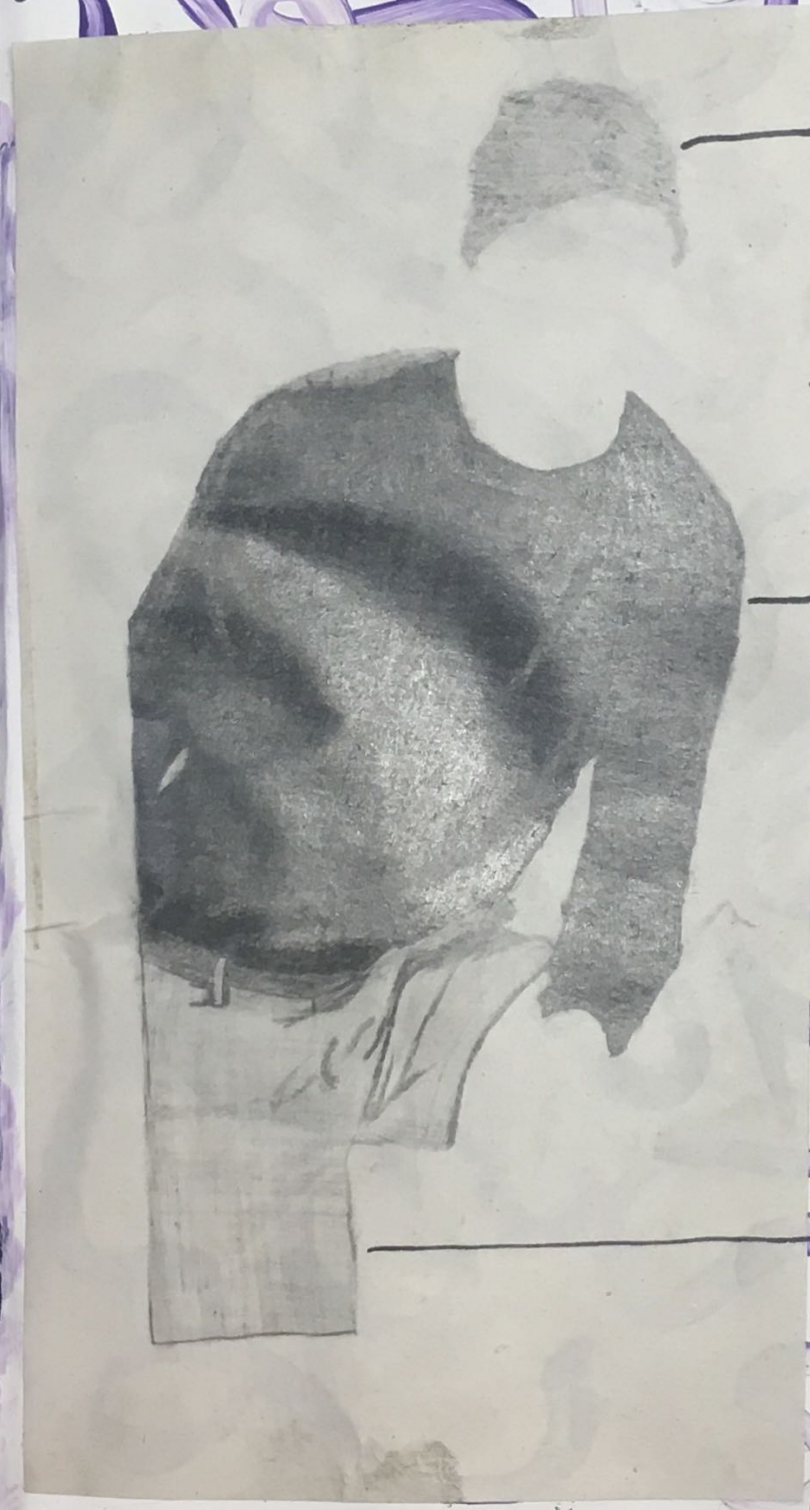

You could
also
check
your Value
Scale and
see if you
match & your
colors are right.

Variation
of an ob-
ject is
using a
range of

LOCALITY

different qualities of an object to create
a sense & visual effect - ex: lightness & darkness.

Average
value
of the
berie is
a 3.

Average
value of
the shirt
is a 9.

The
shirt
is an
absolute
black.

Average
value of
shorts
are a
2. They
are almost
absolute
white.
