WATERCOLOR LANDSCAPE PLAN

In this project we will follow a “plan” to use the new media to its greatest advantage. In the box below, draw a quick contour drawing of the landscape you will complete. Use arrows and text boxes to show where you will use four or more of the advanced watercolor techniques in your painting. After you’ve planned the painting make a quick note (sketch) in your sketchbook of the techniques you plan to use and where you’ll use them so you will have them for use later and turn your plan in to the “IN-BOX” at the front of the class.
